

***Preregistrations – please come back to us asap, as the number is limited,  
for the CRIIGEN 2012 seminars  
at the Mas de Rivet in Barjac:***

The CRIIGEN, which has recently been quite successful in revealing the non-biodegradability and the toxicity signs of pesticides and GMOs, as well as in several court actions and public actions (cf [www.criigen.org](http://www.criigen.org)), is currently launching even more crucial actions in 2012.

In the wake of such moves, three 3-day long strategic CRIIGEN seminars are planned in Barjac, all about national and international actions of NGOs, organizations and firms. Actions to be discussed together, for some crucial and confidential events.

The groups will be welcome in 10 to 20 people gatherings, to whom the venue shall be reserved, including very attractive credits (volunteers can negotiate the credits with their NGO). The use of continuing education credits is envisaged.

Reservations at a very competitive price: they will rapidly be closed as the registrations go on. So please, preregister as soon as you can! There may be waiting lists! The enclosed form needs to be returned asap. If you'd like to take a look at the venue, see the attached slide!

NOT TO BE MISSED: the following topics:

***Keeping up to date, at international level, with the topics listed below:***

***Revelations – Sensitive legal elements likely to modify judgment on studied files –  
Strategic follow-up and coordination of actions***

---

I wish to preregister for the following seminar (*please tick the corresponding box*) in order to book my seat (the registration will be final when the first part is paid):
